Reasons for Revision

Increase in demand, etc. with the economic recovery is somewhat expected, but the shift in new vehicle sales in Japan to light vehicles and change in the composition of in-car navigation systems to low-priced models are among the factors that continue to impact the results of operations of the ZENRIN Group into the third quarter of fiscal 2014 and are expected to result in consolidated and non-consolidated net sales and income each falling below the previous forecast figures.

Furthermore, the non-consolidated results of operations include extraordinary income associated with restructuring of a consolidated subsidiary, but the concerned extraordinary income will be eliminated in consolidation and therefore will not impact the consolidated results of operations.

Disclaimer: The above forecast for results of operations is prepared based on information currently available to ZENRIN Co., Ltd. as of the date of announcement of this document. Actual figures for results of operations may differ from the forecast figures due to various factors in the future.
