#### Reasons for Revision

Concerning the results of operations in the first 2 quarters of fiscal 2017, although net sales are expected to be generally as planned, they are expected to fall somewhat short of the previous forecast figure. In terms of income or loss, in addition to the impact of the lower net sales, the occurrence in the second quarter of a part of the expenses anticipated during the second half of the fiscal year is expected to lead to results lower than the previous forecast figures.

The forecast for results of operations in fiscal 2017 remains as is, since the results are expected to be generally as planned.

Disclaimer: The above forecast for results of operations is prepared based on information currently available to ZENRIN Co., Ltd. as of the date of announcement of this document. Actual figures for results of operations may differ from the forecast figures due to various factors in the future.
